

## **Week 5 Meeting Minutes**

Each Team member drafted, designed, showed and explained their individual FIGMA prototypes to all other team members.

The Team presented the FIGMA prototype to the tutor for feedback.

Each Team member has now locked in and finalised their specific design, specific Hybrid AI model and algorithms and the web development tech stack. An Excel sheet with all these details has been drafted and shared in the team MS Teams group.

The team also confirmed the 4 main goals of the projects and discussed about it in detail

- Analysis
- Detection
- Classification
- Prediction for the future

The FIGMA prototypes of each team member was reviewed by all the other team members and suggestions were made.

The Design methodology, specifications and constraints for the Innovation report were discussed.

The clear Differentiation and uniqueness of the features between each model were discussed.

We also discussed about explaining the exact hybridisation process the AI models would follow and the efficiency gains we would have as a result.
